## Quirky Functional Furniture

### Personal Statement

I use reclaimed wood and fittings to make quirky functional furniture. My influences come from the allotment and smallholding lifestyle I grew up with in rural Oxfordshire. Chickens have always been a central part of my daily life, and so have become the leading characters of my work.

My work ranges in scale and complexity, from single wire chickens to larger wall cabinets. Every piece has a function, with cupboards, drawers and compartments, making them entirely usable and designed for everyday life.

### Education

2005 – 2008
